

Water Treatment Tablets

Instruction Leaflet

Aquatabs and OASIS (water purification tablets) are used to treat drinking water to make it safe for consumption, and for washing of fruits and vegetables. Water purification tablets kill germs that cause diarrhea, cholera and other deadly water borne diseases. Water purification tablets are effective in treating water and simple to use

Instructions

1. Just put one tablet into 20 - 25 liters of clean water in a clean container.
2. Cover the vessel and wait for 30 minutes.
3. After 30 minutes your water is safe to drink. Withdraw your water using a jug or gouda with a handle to avoid dipping your hands during withdrawal of water.

Safety Instructions

- DO NOT overdose. Make sure you use one tablet for 20-25 liters of water only.
- DO NOT consume the tablet
- Keep Aquatabs out of the reach of children
- In case of accidental consumption, DO NOT induce vomiting, but take the person to the nearest clinic for proper medical attention

Water purification tablets are widely available in retail outlets or a health clinic near you.

Remember to use water purification tablets correctly and consistently!
